PROFILE

Mobile engineer with 3+ years shipping production native Android and Flutter applications to Google Play and the App Store. Currently building native Android (Kotlin/Java) POS applications for agency banking with **Stanbic IBTC**, **SwiftPay** and **Hope Bank**, alongside fintech, payments, microfinance and logistics products used by thousands of customers. Owns features end to end — API contract through release, crash triage and iteration — with a focus on clean architecture and dependable REST integration.

TECHNICAL SKILLS

Languages Kotlin · Java · Dart · SQL
Android Native Android SDK · Android Studio · Gradle · Material Design · POS terminal apps · ISO 8583 messaging · EMV card processing · NIBSS integration · agency-banking transaction flows
Cross-platform Flutter · responsive UI · custom widgets · theming · animations
Architecture & State Clean Architecture · MVVM · dependency injection · Riverpod · BLoC · Provider
Data & Integration REST APIs · Retrofit · OkHttp · Dio · JSON serialization · SQLite · secure storage · offline-first sync · caching
Firebase Authentication · Firestore · Cloud Messaging · Remote Config · Crashlytics · Analytics · App Distribution
Testing & Delivery Unit, widget and integration testing · Git · GitLab · CI/CD · Google Play Console · App Store Connect · Agile / Scrum

PROFESSIONAL EXPERIENCE

Android Developer
2024 – Present

TM30 Global Limited · *Lagos, Nigeria · agency banking for Stanbic IBTC, SwiftPay and Hope Bank*

- Build native Android (Kotlin/Java) agency-banking POS applications for **Stanbic IBTC**, **SwiftPay** and **Hope Bank**.
- Completed **NIBSS** integration for the SwiftPay POS application, enabling card transactions to be processed through Nigeria's interbank switch.
- Developing the Stanbic IBTC agency-banking POS application, now in the final stages before launch.
- Implement **ISO 8583** messaging between POS terminals and payment hosts — building, packing and parsing transaction messages and handling host responses.
- Integrate **EMV** card processing for card-present transactions, alongside card and QR payment flows across multiple POS application variants.

Flutter Developer (Mobile Engineer)
Jan 2024 – Present

TM30 Global Limited · *Lagos, Nigeria · fintech, payments and logistics products*

- Own delivery of production iOS and Android applications end to end — architecture, API contract review, release and post-launch crash triage — serving 5,000+ active users.
- Structured codebases around clean architecture and dependency injection with standardised Riverpod/BLoC state management, keeping features isolated, testable and safe for parallel work.
- Built a shared library of 50+ reusable widgets, themes and design tokens, eliminating duplicated UI code and cutting the time to assemble a new screen from days to hours.
- Integrated REST services with Dio using typed models, interceptor-based token refresh, retry and structured error mapping — cutting request failures by roughly 35% and removing a recurring class of silent authentication logouts.
- Instrumented Firebase Crashlytics and Analytics and triaged the top crash clusters each release, lowering crash rates by roughly 35%; responsive layouts verified across 15+ device sizes cut UI-related support tickets by roughly 20%.
- Automated builds and internal distribution with CI/CD and Firebase App Distribution, shortening QA turnaround from a day to under an hour; shipped releases through Google Play Console and App Store Connect with staged rollouts, at 4.5+ star ratings.

SELECTED PRODUCTS

- **TATD Logistics** — logistics and delivery app: shipment creation, real-time tracking and status notifications, wallet and payment flows, plus driver and admin dispatch views.
- **Paymeter NG** — utility payments app: prepaid electricity tokens and bill payments with multi-method checkout (cards, bank transfer) and real-time confirmation.
- **Ellington MFB Business** — MSME banking app: KYC onboarding, digital loan applications, invoicing, bulk payments, analytics dashboards and agent-banking tools. 2,500+ businesses onboarded; ₦500M+ processed.

EDUCATION

B.Tech (Hons), Computer Science
May 2023

Ladoke Akintola University of Technology · *Ogbomoso, Nigeria*

ADDITIONAL

National Youth Service Corps Nov 2023 – Oct 2024 — served as Android Developer at TM30 Global Limited, building native Kotlin/Java features.
Other shipped products Whitecrust Microfinance · Adashi (digital thrift/ajo savings, 10,000+ users) · Digital Financial Freedom · AccessGov · Payarena.
